CODA Unofficial Report of Major Actions

by Cindy Biron

Here is a summary of the CODA February 1-2, 2018 Unofficial Report of Major Actions limited to concerns of DA and DH Programs.

Accreditation Reports

- 1 New DH Program granted accreditation
- 7 DA Programs received a formal warning that accreditation will be withdrawn in August 2018 unless the requested information, demonstrating compliance with the accreditation standards, is submitted prior to that time.
- 1 DA and 2 DH programs submitted voluntary discontinuance of accreditation effective on planned closure date.

Proposed Revisions to Accreditation Standards to be circulated to the communities of interest for comment including, as applicable hearings at the 2018 ADA Annual Meeting, 2018 ADEA Annual Meeting, and 2018 ADAHA Annual Meeting.

- DA Standards 1-7, 2-5, 2-21, 2-22, 3-4, and 3-6
- DH Standards 2-14, 3-7

Revisions to Standards with Immediate Implementation

- DH Definition of Terms and Standards 2-8d and 2-13, with circulation to the communities of interest until June 1, 2018, for consideration at the August 2018 meeting of the Commission.
- DH Standards 2-1 and 2-24, with circulation to the communities of interest until June 1, 2018, for consideration at the August 2018 meeting of the Commission.

Proposed Revisions to Standards 2

Sharpening: Irrefutable Evidence 7

In the Spotlight 10

Camp Schedule 12

Standing Committee on Finance

Approved 2019 Annual and Application Fees as follows:

- 4% increase in annual fees for all disciplines in 2019
- $1970 for DA, DH, DT
- $1400 for DLT
- Doubled fees year of site visit
- $16,850 New Program Application fee
- $4,320 for Focused Site Visit
- $4,000 CODA Penalty for Non-Compliance with CODA Policy on HIPAA effective Winter 2018
- $1000 Penalty for electronic conversion of documents

Boot Camp Retreat for Dental Educators

July 30 - August 3, 2018

www.DHmethEd.com
Proposed Revisions To Standards

Definitions of Terms Used in Dental Hygiene Accreditation Standards

Dental Hygiene Diagnosis: Identification of an existing or potential oral health problem that a dental hygienist is qualified and licensed to treat. The identification of an individual’s health behaviors, attitudes, and oral health care needs for which a dental hygienist is educationally qualified and licensed to provide.

Dental Hygiene Process of Care: A framework where the individualized needs of the patient can be met. The process identifies the causative or influencing factors of a condition that can be reduced, eliminated, or prevented by the dental hygienist. There are six components to the dental hygiene process of care: assessment, dental hygiene diagnosis, planning, implementation, evaluation, and documentation.

Interprofessional Education: When students and/or professionals from two or more professions learn about, from and with each other to enable effective collaboration to improve health outcomes.

STANDARD 2 - EDUCATIONAL PROGRAM Curriculum

2-8d Dental hygiene science content must include oral health education and preventive counseling, health promotion, patient management, clinical dental hygiene, provision of services for and management of patients with special needs, community dental/oral health, medical and dental emergencies, legal and ethical aspects of dental hygiene practice, infection and hazard control management, and the provision of oral health care services to patients with bloodborne infectious diseases.

Intent: Dental hygiene sciences provide the knowledge base for dental hygiene and prepares the student to assess, perform dental hygiene diagnoses, formulate a treatment plan, implement, and evaluate, and document dental hygiene services as an integral member of the health team. Content in provision of oral health care services to patients with bloodborne infectious diseases prepares the student to assess patients’ needs, perform dental hygiene diagnoses, and formulate a treatment plan, implement, and evaluate, and document appropriate treatments.

2018 DH Clinic Key Will be Available July 2018!
Patient Care Competencies

2-13 Graduates must be competent in providing the dental hygiene process of care which includes:

a. comprehensive collection of patient data to identify the physical and oral health status;

b. analysis of assessment findings and use of critical thinking in order to address the patient’s dental hygiene treatment needs; formulation of dental hygiene diagnoses which require evidence-based critical analysis and interpretation of assessments in order to reach conclusions about the patient’s dental hygiene treatment needs;

c. establishment of a dental hygiene care plan that reflects the realistic goals and treatment strategies to facilitate optimal oral health;

d. provision of patient-centered treatment and evidence-based care in a manner minimizing risk and optimizing oral health;

e. measurement of the extent to which goals identified in the dental hygiene care plan are achieved;

f. complete and accurate recording of all documentation relevant to patient care.

Intent: The dental hygienist functions as a member of the dental team and plays a significant role in the delivery of comprehensive patient health care. The dental hygiene process of care is an integral component of total patient care and preventive strategies. The dental hygiene process of care is recognized as part of the overall treatment plan developed by the dentist for complete dental care.

Examples of evidence to demonstrate compliance may include:

- Program clinical and radiographic experiences
- Patient tracking data for enrolled and past students
- Policies regarding selection of patients and assignment of procedures
- Monitoring or tracking system protocols
- Clinical evaluation system policy and procedures demonstrating student competencies
- Assessment instruments
- Evidence-based treatment strategies
- Appropriate documentation
- Use of risk assessment systems and/or forms to develop a dental hygiene care plan

Computerized Clinical Grading & Outcomes Assessment for Dental Programs

Available in Two Grading Formats:
- Objective Statistical Analysis
- Grade by Appointment
- Web based & Encrypted

Reports Generated Serve as Exhibits for CODA:
- Total Class Performance by Skill
- Individual Student Performance by Skill
- Remediation Variable & Probability
- Patient Care Report with Instructor Comments
- Patient Treatment Tracking
- Instructor Calibration Graph
- Technique Evaluations
- Treatment Phase Tracking
- Grades Individual Students by Critical Error Feature
- Progression of Student Skill Development Graph
- Surveys of Students, Patients, Graduates, Employers

The BEST computerized grading & tracking system designed just for DH programs. Conducts surveys and generates reports for CODA self-study exhibits.

Curriculum Management

2-24 The dental hygiene program must have a formal, written curriculum management plan, which includes:

a) an ongoing curriculum review and evaluation process with input from faculty, students, administration and other appropriate sources;

b) evaluation of the effectiveness of all courses as they support the program’s goals and competencies;

c) a defined mechanism for coordinating instruction among dental hygiene program faculty;

d) a defined mechanism to calibrate dental hygiene faculty for student clinical evaluation.

Intent:

To assure the incorporation of emerging information and achievement of appropriate sequencing, the elimination of unwarranted repetition, and the attainment of student competence, a formal curriculum review process should be conducted on an ongoing and regular basis. Periodic workshops and in-service sessions should be held for the dissemination of curriculum information and modifications.

Examples of evidence to demonstrate compliance may include:

- competencies documentation demonstrating relationship of course content to defined competencies of the program
- documentation of ongoing curriculum review and evaluation
- minutes of meetings documenting curriculum review and evaluation
- student evaluation of instruction
- curriculum management plan
- documentation of calibration exercises
Sharpening: Irrefutable Evidence

Just because the instrument cutting edge grabs a test stick, it doesn’t mean the sharpening technique restores the original contour of the instrument blade. If the test stick alone is your criteria for determining the effectiveness of your sharpening technique, please look at the research.

Evaluation of three different manual techniques of sharpening curettes through a scanning electron microscope: a randomized controlled experimental study.

Di Fiore A¹, Mazzoleni S, Fantin F, Favero L, De Francesco M, Stellini E.

Abstract

OBJECTIVE:

The purpose of this study was to compare the effectiveness of three different techniques for manually sharpening of periodontal curettes (PCs) by examining the blades with the aid of scanning electron microscope (SEM).

METHODS:

Three groups were considered based on three sharpening methods used: group A (moving a PC over a stationary stone); group B (moving a stone over a stationary PC) and group C (moving a PC over a stone fixed, placed on a ‘sharpening horse’). After the sharpening, the blades were examined using SEM. The SEM images were assessed independently by five different independent observers. An evaluation board was used to assign a value to each image. A preliminary pilot study was conducted to establish the number of samples. Pearson’s correlation test was used to assess the correlations between measurements, anova test with Bonferroni's post hoc test was used to compare the three groups.

RESULTS:

Sixty PCs (20 PCs per group) were used in this study. Statistically significant differences emerged between the three groups (P-value = 0.001). Bonferroni’s test showed that the difference between groups A and B was not statistically significant (P-value = 0.80), while it was significant for the comparisons between groups A and C (P-value = 0.005) and between groups B and C (P-value = 0.001).

CONCLUSIONS:

The sharpening technique used in group C, which involved the use of the sharpening horse, proved the most effective.
The Sharpening Horse was introduced six years ago with the demonstration of one technique: Fulcrum on the beam of the Horse while moving the instrument across the stone and pivoting to maintain the contours of the blade. Some faculty and students found the technique difficult to master. Sure enough, students taught us a simpler technique. Fulcrum on the leg or fulcrum the whole hand on the table holding the instrument stationary while using the non-dominant hand to move the entire Sharpening Horse Fixture and Stone as a unit around the entire blade. As long as the face of the blade was kept parallel to the table top and movement according to the contours of the blade were maintained; precise, perfect cutting edges were created. Since the sharpening technique was still performed along the length of the blade, no multi-bevels or irregularities were created. No conical stone finishing necessary.

Watch the video demonstration to learn the new techniques:
https://www.youtube.com/watch?v=r4A56UuTP3Q&feature=youtu.be

And the technique is easy for either edge always moving heel to toe!
Testimonials on the Sharpening Horse

“Now that the students use the Sharpening Horse, we can introduce sharpening earlier in the curriculum as it is so easy for them to master the technique. The instruments last longer. When they trade in their instruments before they take their boards the instruments are not over sharpened and worn like they used to be with the old techniques. With the Sharpening Horse technique there is more cutting edge left than before. It is much easier to get consistency with their sharpening with this technique. I have tried all the sharpening systems out there and this is the only thing that truly works!” Marta Ferguson, RDH, PhD, Director of Dental Hygiene, Indian River State College, FL

“The report from the second year instructors is that the students’ instruments are not only sharp, but they are holding their shape and contour which is a vast improvement over the stationary instrument/moving stone method which caused many curettes to be turned into sickles from holding the stone at the wrong angle. The Sharpening Horse is easy to teach and use!” Janet Ogden, RDH, MS Columbia Basin College, WA.

“We teach the students the stationary instrument/moving stone method first and then show them the Sharpening Horse. This year, the students wanted to know why we taught the other method when the Sharpening Horse is so much easier and exact. I like the Sharpening Horse because it makes sharpening so easy. “DIY Sharpening for Dummy’s!” No need to spend so much time thinking about angles. The Sharpening Horse automatically “sets the perfect angle” of the stone for the bevel of the blade.” Susan Smith, RDH, MS Clinic Coordinator, Wake Technical College, Raleigh, NC.”

“I discussed the Sharpening Horse technique with the full-time faculty and they said instrument sharpening has been much easier to teach and learn using the Sharpening Horse technique. By using it routinely students have positive experiences with their instrumentation. The Sharpening Horse helps to maintain the integrity of the instruments.” Susan Moss RDH, MS, Collin State College, McKinney, TX

“The Sharpening Horse design is a brilliant, user friendly approach to the critical maintenance of dental hygiene instruments. The concept and the technique is very adaptable for novice and experts in dental hygiene, and our program faculty made the Sharpening Horse its choice recommendation for the dental hygiene student kits from this time forward!” Vicki L. Snell RDH, EdM Lewis & Clark Community College, IL

“Recently I had the opportunity to sharpen many instrument kits for a hands on scaling technique presentation. Each kit contained 10 various curettes and scalers. I was amazed at how easy it was to sharpen these instruments quickly and precisely with the Sharpening Horse. I recommend the Sharpening Horse to all my students, faculty and fellow hygienists at every given opportunity. When I am in clinic and instruments need sharpening I have the students take their instruments for a quick ride on the Sharpening Horse and they are truly amazed at how accurate and easy this technique is to return their blades back to a sharp and effective working edge.” Cathleen Korondi, CDA, RDH, EdM, Director of Dental Hygiene Illinois Central College

The sharpening horse has proven to be the best method of sharpening instruments for our students. The technique is easy to learn for beginning clinicians, producing a sharp cutting edge and maintaining the original design of the blade. The instruments are lasting longer, since the students can consistently control the angle, pressure and movement of the blade against the stone. They love it and sharpening has never been so easy. Michele Edwards, CDA, RDH, MS Tallahassee Community College Dental Programs, FL.

Instrument sharpening is one of the most important, yet challenging, skills for hygiene students to master. The Sharpening Horse makes this skill easy to learn and students can quickly produce a perfectly sharp cutting edge restoring the blade in its original design. Confidence in their ability to produce a sharp cutting edge motivates students to employ instrument sharpening as a routine daily task. Jill S. Nield-Gehrig, RDH, MS, Dean Emeritus Asheville-Buncombe Technical College, NC.

The Sharpening Horse is great to use chairside as it is easy to use and to autoclave. It has given the students the confidence to sharpen their instruments without asking, “Am I doing this right?” Our instructors say that the Sharpening Horse makes it so easy for students to sharpen instruments they actually use it in clinic!” Catherine Dunn, RDH, MS Director of Dental Hygiene Mississippi Delta College

Sharpening Horse Kits include the fixture, ceramic stone, directions and test sticks. Original instructions on how to use the Sharpening Horse can also be found on Pages 616-623 of this textbook

In the Spotlight

Marianne Dryer is a dynamic speaker, educator and corporate consultant in curriculum development. She has lectured nationally and internationally on periodontal instrumentation with a focus on ultrasonic technique, risk assessment, infection prevention and radiology technique. Marianne’s experience in dentistry spans over 30 years. She is a graduate of Forsyth School for Dental Hygienists, Old Dominion University and received her Master’s in Education from St Joseph’s College of Maine. Marianne was the first year coordinator at Collin College in Dallas Texas for six years where she was selected for the Outstanding Faculty Award and was nominated for the Advisor of the Year. She has been a faculty member at Cape Cod Community College since 2007. Marianne is also a Periodontal Instrumentation Instructor for DH Methods of Education, Inc., Summer Camp Amelia Island. She has been on the camp faculty on alternating years since 2008 at Summer Camp Boston, Summer Camp Jacksonville, Summer Camp Amelia Island, and Fall Camp Collin College. This year Marianne will be teaching in the DH Clinical Teaching Methodology Workshop and the Radiology Educator’s Workshop (hands-on session). She will also be presenting the course “Coronal Polishing Within the Curriculum” on Thursday evening 5:15—6:15pm. This course is free to those who are enrolled in at least one other day course in the camp.

Brent Molen has been teaching dental hygiene students since 2008. Brent currently serves as a permanent Board Member and as College President and Program Director of the dental hygiene program at the Utah College of Dental Hygiene (UCDH) in Orem, Utah. He has taught numerous courses including Dental Morphology, Dental Embryology & Histology, Dental Materials, National Board Review, Professional Dental Hygiene IV, and Expanded Functions. Brent has also served as a clinical instructor for first and second year dental hygiene students as well as a clinical local anesthesia instructor. Brent has been working in the dental field for more than twenty eight years. He has worked as a dental assisting program instructor, a dental laboratory technician, a dental laboratory owner, a co-owner of two dental practices (The Mall Dental Group and Hollywood Dental for Kids), a dental front office manager, a pediatric surgical center/O.R. dental assistant, and a dental hygienist/educator/administrator. Brent has been the Western Regional Examination Board (WREB) School Coordinator at the Utah College of Dental Hygiene since 2008. In 2012 Brent was presented with the Instructor of The Year Award from the Accrediting Commission of Career Schools and Colleges (ACCSC) and in 2015 was presented with the Volunteer of the Year at ACCSC’s Annual Meeting. Brent has volunteered as a Team Leader conducting accreditation site visits for ACCSC since 2008. He enjoys speaking in various forums and locations nationally sharing his ideas with other like-minded dental professionals. This is Brent’s third year on the faculty Summer Camp Amelia Island. This year he is teaching in two of the free evening courses: Course #12 ProFound L.A. and Course #13 Preview to Teaching Your Own Board Review. He is also presenting the workshop Course #8 How to Teach Local Anesthesia.

The Free Evening Courses

There are three courses offered Tuesday, Wednesday and Thursday evenings. They are each one hour long, 5:15-6:15pm. They are only available to those who are enrolled in at least one day course during camp. Register at the door at 5:00pm on the evening of each class you wish to attend. You will receive your certificate at the end of each course.
